43 710	Bark Soap dispenser	Dispenser	2 L & H25 D15,5 B15,5

PRODUCT DESCRIPTION

Bark Soap is an environmentally friendly hand soap in powder form that cleans heavily soiled hands. It is very effective against tough and ingrained dirt such as grease, oil, sludge, paint, ink etc.

The soap is gentle on the skin, and it is also moisturizing thanks to the lavender oil.

The product is highly concentrated and is diluted with water on the hand. For best results, wet your hands, take some of the soap powder and rub your hands.

Then rinse off and be mesmerized by how clean and soft your hands become and also how pleasantly they smell afterwards.

Bark Soap contains powdered bark which is a residual product from sawmills and is also completely biodegradable and free of microplastics and harmful substances. This is one of Rahmqvist's Green Choice products that contribute to a better environment. Your hands will thank you for choosing such a quality and completely natural product.

USER MANUAL

For best results, wet your hands, take some of the soap powder and rub your hands. Rinse off. Hands become clean and soft with a pleasant fragrance. Close the gel tube after use so that air does not get in and risk drying out the product. Store at normal room temperatures.

TECHNICAL/CHEMICAL INFORMATION

Several years of shelf life when stored in unopened packaging. If the packaging is broken, it has a shelf life of 18 months. Slightly basic pH value.
