#### PRODUCT DESCRIPTION

This unique cleaning wipe is perfect for those who are exposed to dirt on a daily basis. The wipe kills bacteria, fungi and viruses such as intestinal bacteria, skin bacteria, HIV, Hepatitis B and Hepatitis C within 30 seconds. Reduces the risk of spread of infection in connection with colds, flu and stomach illness and winter illness.

The softening peppermint oil has a healing effect on small wounds, and leaves a fresh and pleasant scent on the hands. The napkins do not freeze because they contain alcohol and can be used outdoors in freezing temperatures.

As if that were not enough, it also neutralizes strong

odors on dirty hands and instead leaves a fresh and pleasant scent.

#### USER MANUAL

For disinfecting effect of very dirty hands, use two wipes, one for cleaning and one for disinfection. Store upright with the lid closed, out of direct sunlight. Double lids guarantee several years of durability (warranty 24 months) when stored in the original packaging.

#### TECHNICAL/CHEMICAL INFORMATION

Contains softening peppermint oil and 70% isopropanol, which provides a 100% disinfecting effect. A separate certificate is available from Lund University Hospital.

Ph value : around 7
