

## NEUTRALIZER GEL LEMON\_ NEUTRALIZER GEL

---

Neutralizer gel is completely non-toxic and vaporizes around the clock to provide constant odor elimination.

Scander Neutralizer Gel has a unique blend of natural ingredients; water, lime, pine, anise, cloves, limonene and cedar. It is environmentally friendly and safe to use.

The technology behind Scander Neutralizer Gel is based on four simple, but effective principles:

1. Contact: Neutralizer Gel's molecules are released into the air. Via electronic charging, but also randomly, they attach to "molecules-with-a-bad-smell".
2. Absorption: Neutralizer Gel's molecules absorb and destroy the odor at a molecular level.
3. Solubility: Neutralizer Gel dissolves most gases.
4. Reaction: Scander Neutralizer Gel changes "bad-smelling molecules" to a non-smelly state.
5. Shelf life is up to 40 days when opened.

### PRODUCT DESCRIPTION

Scander Neutralizer Gel Lemon eliminates bad odors in an environmentally friendly and effective way. Neutralizer gel has been developed from a proprietary blend of natural ingredients that contain mostly water and essential plant oils without harsh chemicals. Neutralizer gel is safe and environmentally friendly to use in all situations.

The molecules are released into the air, which then comes into contact with the odor molecules, via opposing electrostatic charges and random contact. The odor molecules are absorbed and a chemical reaction occurs that modifies the odor molecules to an odorless state. Available as a refill.

### USER MANUAL

Unscrew the plastic cover, remove the foil cover, screw on the plastic cover and leave in the room with bad smell. Up to 60 days, the gel will evaporate and at the same time counteract bad odors.
